

Backup Service

it's time for your data to return home

PDX protects your Microsoft 365 configuration, data and logs.

Designed to meet all of your compliance and business continuity requirements and keeps your data safe, right here in Australia.

Built and maintained by experts in cyber security, data protection and extensive experience in federal government.

Now more than ever, it's critical to keep your data, configuration and logs safe. PDX secures your data right here in Australia, whichever cloud you use.

Keep your data safe by keeping it local & longer

Microsoft 365 data backup and log retention for compliance with Archives Act.

Keep your business moving safely

Maintain complete control of your data on dedicated, cloud-connected NetApp storage - right here in Australia.

Pick a cloud, or a couple of clouds that are right for you and your business

Keep your data close to multiple clouds, connect easily to one, two or three clouds.

Use your data, your way

Switch cloud vendors in minutes without moving your data. Mind blown.
