

Customer success story

Challenges

The agency required a new and innovative end user computing solution to improve productivity, increase flexibility and support remote workers across the country. The agency tendered for an experienced partner to transform its EUC platform with cloud services and technologies.

- The agency required highly skilled consultants to work closely with internal teams to deliver an innovative Modern Desktop solution leveraging Microsoft technologies such as Office 365 and Enterprise Mobility + Security (EM+S) services.

Solution

oobe completely transformed the agency's End User Computing environment with Microsoft 365 services. requirements.

oobe designed and configured Office 365 and EM+S services in a secure manner, adhering to Australian Cyber Security Centre's 'Essential 8' requirements.

The new EUC platform saw oobe deploy the latest Windows operating system on newly purchased laptops, and re-package over 200 applications to the new operating system.

oobe also deployed its PROTECTED-ready Azure Virtual Data Centre framework (Perimeta for Azure) to enable the agency migrate workloads into Azure regions within Australia.

The new solution enabled the agency to roll out its organisationwide initiative to transform how users' access to IT services.

It enabled its staff to work remotely, provided an enhanced and performant platform, and supported teams-based activities without sacrificing security.
