

# Identity and Administration for Azure

Extend your identity boundary into Azure

Embrace cloud with freedom and confidence by securely extending your identities to Azure. Consume cloud services using identities that you control. Meet the security and assurance requirements placed on government.

What is Identity and Administration for Azure?

Identity and Administration for Azure is a solution developed by oobe that enables you to utilise your on-premises identities such as those in Microsoft Active Directory to access and administer your cloud resources hosted in Azure.

## Why customers use Identity and Administration for Azure

- Just-in-time administration and Privileged Account Management
- Simplified, consolidated identity management for on-premises and Azure
- ASD Essential Eight compliance for Azure workloads with multifactor authentication and restricted administrative privileges

### Identity, controlled

#### We've done the work for you

Only accounts that have been created and authorised by the organisation can be used to access Azure resources. No accounts can be created outside of this solution, and auditing provides action accountability and traceability.

#### Scalable and affordable for every business

### Cloud presence, secured

#### Building on Microsoft's trusted cloud

Utilise in-built features of Azure to securely replicate, store and authenticate identities across a wide range of use cases, applications and services.

#### Constantly monitored, maintained and matured

### Multi-tenant Administration

#### Do what your business does best

Focus on building business capabilities knowing your Azure environment is protected by a secure, flexible, scalable administration architecture that controls, mitigates and audits any risks of compromise or misuse.

#### Thousands of hours of development

Identity and Administration for Azure brings together the best technologies and services available from Azure and the brightest technical minds with years of relevant industry experience, so that you can focus on what your business does best.
