

Networking and Connectivity for Azure

Building a scalable and agile hybrid cloud network

Kick-start your cloud journey and consume Azure services as though they're simply an extension of your environment. Gain visibility and control over your data and integrate powerful cloud services with on-premises applications.

What is Networking and Connectivity for Azure?

Networking and Connectivity for Azure allows you to get the most out of hyperscale cloud computing by securely extending your corporate network boundaries into Azure. Confidently deploy solutions knowing that trusted controls, processes and automation are in place to encapsulate and protect your presence in the cloud, silently maintaining the security and integrity of your systems and data.

Why customers use Networking and Connectivity for Azure

- Securely connect to Azure as an extension of the environment.
- Rapidly deploy an industry validated, best-practice, Hub and Spoke topology for a scalable and agile hybrid cloud network.
- Accelerate digital transformation by leveraging validated solutions developed by cloud experts.

On-boarding, streamlined

We've done the work for you

Fast track cloud connectivity with a defined set of processes and standards for planning, deployment and support.

Scalable and affordable for every business

Cloud presence, secured

Building on Microsoft's trusted cloud

Maximise your cloud investment with Azure native tools and services tailored to address the connectivity, scalability and agility needs of your business.

Constantly monitored, maintained and matured

Networking, controlled

Do what your business does best

Networking and Connectivity for Azure builds your cloud network for you, which increases agility and empowers business and application owners to focus on building capabilities.

Thousands of hours of development

Networking and Connectivity for Azure brings together the best technologies and services available from Azure, the brightest technical minds with years of relevant industry experience, so that you can focus on what your business does best.
