

# Policy and Compliance for Azure

Extend your security boundary into Azure

Embrace cloud with freedom and confidence knowing that you control the services, locations and configuration that can be used for your business

## What is Policy and Compliance for Azure?

Policy and Compliance for Azure ensure your cloud deployments only use the locations, services and configuration that you authorise and allows you to rapidly meet cloud security and regulatory compliance requirements.

## Why customers use Policy and Compliance for Azure

- Achieve government or regulatory compliance for Azure workloads
- Decrease time to deployment by leveraging a fully developed framework
- Accelerate digital transformation with confidence to build and deploy in Azure.

### Deployment, streamlined

#### We've done the work for you

Confidently deploy workloads into secured Azure subscriptions knowing that policies will restrict the operations that can be performed to only those that are authorised and approved for use.

#### Secure by design

### Cloud presence, secured

#### Building on Microsoft's trusted cloud

Maximise your cloud investment with Azure native tools and services tailored to address the security and compliance needs of government and regulated industry.

#### Constantly monitored, maintained and matured

### Innovation, assured

#### Do what your business does best

Policy and Compliance for Azure maintains configuration integrity, which increases agility and empowers business and application owners to focus on building capabilities.

#### Thousands of hours of development

Policy and Compliance for Azure brings together the best technologies and services available from Azure and the brightest technical minds with years of relevant industry experience, so that you can focus on what your business does best
