Assess your readiness

Get ready for Microsoft Copilot by performing a readiness assessment with AvePoint Insights for Microsoft 365.

Understand where your sensitive data is held, who has access, then take steps to manage the risk.

Performing a readiness assessment with oobe using AvePoint Insights for Microsoft 365 will give you reporting on permissions data across your tenant, or drill down into Teams, Groups, SharePoint or OneDrive to identify risks at levels that you define.

Microsoft 365 Copilot only surfaces organisational data to which individual users have at least view permissions.

- Ensure your sensitive data is restricted to only those who need to access it.
- Build your own sensitive information types using Microsoft Purview
- **Assess and report**

The two-week readiness assessment

Day 1 initial workshop to define sensitivity and exposure definitions

Day 2 oobe connects AvePoint Insights to your M365 tenant, the analysis starts

Day 5 the analysis is complete

Day 9 – workshop to review results and options to remediate high-risk data

Day 10 – oobe and AvePoint are available for any other queries

Day 14 – assessment completed, report delivered
