What is Perimeta for 365?

Perimeta for 365 is a SaaS configuration management tool for Microsoft 365. It is used to rapidly deploy, monitor, analyse, and maintain a secure Microsoft 365 environment.

How does it work?

It automatically monitors tens of thousands of Microsoft 365 settings across office productivity, security, identity, device management and more. With features such as real-time alerting, one-click remediation for configuration drift and instant assessments, Perimeta for 365 streamlines the process of meeting regulatory requirements, enhancing efficiency in your compliance efforts.

Why is it superior to other products?

Comprehensive compliance monitoring

Perimeta for 365 is the only product capable of monitoring and managing all the necessary configuration settings for compliance in regulated industries by using custom automation that goes beyond the published APIs that other tools use.

Trusted by the Australian Government

Perimeta for 365 is used by the Australian Government to manage and maintain Microsoft 365 to the most stringent security standards. Its robust compliance and evaluation capabilities make it a fitting choice for organisations operating in regulated sectors.

Customised compliance baselines

Perimeta for 365 adapts its baseline to match your organisation's unique requirements, aligning compliance efforts precisely with your needs.
