

Reinventing how businesses **engage** with technology

oobe's different. With us you inherit everything we've learned across every client engagement. There's more than enough work to be done, so if we've done it before we're going to bring those learnings, assets and the automation to deliver quality results faster. With a core emphasis on security, we're focused on simplifying technology and making it work for you so you can get on with what your business does best.

Perimeta
for 365

Automate the configuration and ongoing compliance of Microsoft 365.

perimeta.com.au

macrosine

Office macro and PowerShell security made simple.

The blueprint

The new benchmark in configuration for Microsoft 365 and Azure.

blueprint.oobe.com.au

We create efficiencies through technology that allow businesses to focus on what they do best.

Things we're great at...

All things Microsoft, especially Azure and Microsoft 365

Modern workplace

Give your team the tools they need to get stuff done whenever they need, from wherever they need. In an increasingly complex technology-driven world, oobe believes you should be able to open the lid and the technology should just work. We focus on getting the technology out of the way so you can focus on what you do best.

Cloud

We help organisations fulfil the promise of cloud. Accelerate digital transformation and build solutions that deliver real value without the spiralling costs and without excessive complexity. Our team of highly skilled consultants genuinely understand the technology and can help you use it to meet your needs and achieve your goals.

Security

Empower your business to make the most of technology without compromising your security. We help you understand and improve your cyber posture and address all of your regulatory compliance requirements. Through our practical and pragmatic approach, we can help you make genuine improvements that protect your digital assets.

Connectivity

Connecting workers and their devices with the apps and services they need relies on secure and seamless connectivity. We understand that delivering a successful technology outcome can't be achieved without a quality communications layer. That's why we have specialists with a wealth of knowledge and experience in this field.
