

How does your organisation stack up?

...against Australia's benchmark cyber security baseline.

The challenge

Reporting on your Essential Eight maturity is now commonplace, whether it be for internal stakeholders or part of annual legislative and regulatory requirements. Just because it's commonplace, doesn't mean it's always simple. You need to find an assessor you can trust who understands your organisation's specific security controls who can also give you recommendations to improve your position without impacting your business or disrupting your users.

Uplifts

Implementing controls across 'the Eight' to improve maturity levels and reduce risk, with a key focus on maximising ROI from Microsoft 365 licensing, plus additional capabilities from Tenable and Ivanti.

Assessments

Based on the ACSC's guideline, and using a combination of their tools, third-party software, and some extras of our own, we provide a report that not only provides a high-assurance scorecard, but also actionable recommendations to improve security without sacrificing user experience.

Our pedigree

We have a long history with the Essential Eight as both assessors and remediators. The feather in our cap was our involvement in the Cyber Security Response Fund, engaged to assist high-risk and high-value Departments and Agencies to assess and uplift these environments, on behalf of the ACSC.

Our support of our clients on their Essential Eight journey is unwavering. We have partnered with organisations spanning various industries and sizes, catering to those who are just starting this journey and those who have been on it since its inception. Remarkably, we've even undertaken assessments on behalf of the ACSC for high-profile Federal Government organisations.

How can oobe help?

For as long as there's been an Essential Eight, oobe has supported its clients by performing assessments and implementing solutions to improve their security posture and maturity. Our team has experience across a wide range of industries and sizes of organisations, some of whom have just started out on their Essential Eight journey, and others that have been across it since day one. We have even performed assessments on behalf of the ACSC themselves for high-profile Federal Government organisations.

Our approach

Combining a proprietary set of tools, vendor partner solutions, and resources from the ACSC. This data-driven assessment is enriched by our team's vast experience, taking into account the crucial human element of security, often overlooked by others in the field.

We're not simply an entity focused on box-checking; instead, we furnish you with comprehensive reports that provide a clear snapshot of your current status, along with valuable recommendations for improvement. All this is done while ensuring that security does not hinder your efficiency, innovation, or user experience.

Summary

Cyber threats are everywhere and increasing every day. The Essential Eight is the Australian Cyber Security Centre's (ACSC) baseline of mitigation strategies to reduce the risk of a breach. It's basically a roadmap to increase your company's security posture that is endorsed by the highest cyber security authority in Australia.

Not just for government and critical infrastructure, the Essential Eight is best practice cyber security for every organisation in Australia.
